

The image features a large window or glass door looking out onto a wooden deck with three grey pouffes. The background shows a landscape with trees and a cloudy sky. The SIT logo is in the top left corner.

SIT

Expert

in the manufacture of pouffes

and more...

from 2006

EXPERIENCE

Since 2006 the Sit-Sit company has been manufacturing pouffes filled with polystyrene granulate. Our products are available on the market under the brand name SIT-SIT, but we also successfully cooperate with companies offering individual products under their own logos.

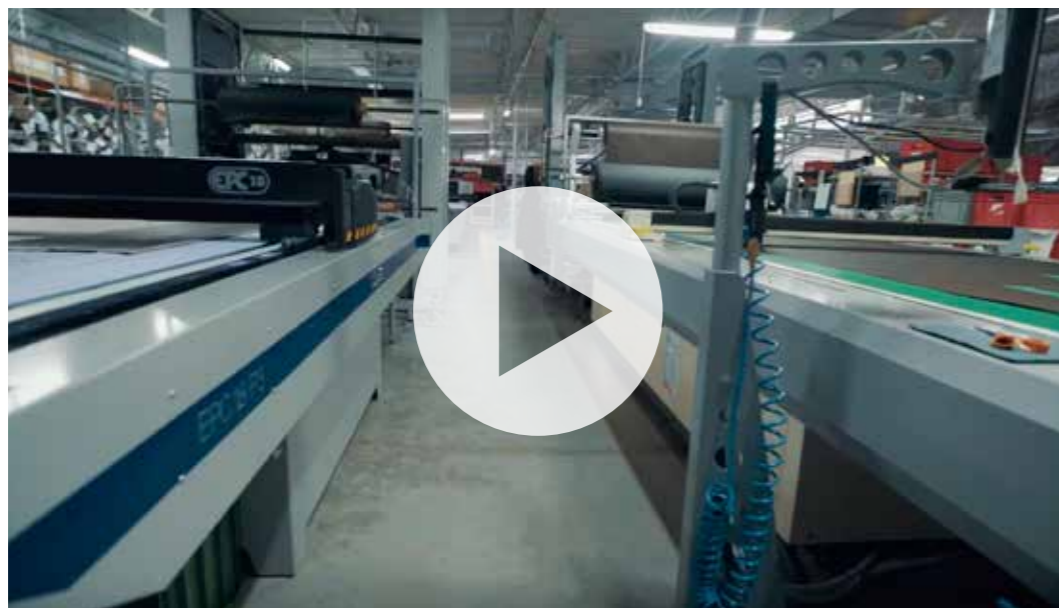

We are proud of our long-term cooperation with well-known furniture manufacturers and the largest retail chains in the world.

MANUFACTURING BASE

Our own manufacturing facilities, continuously audited manufacturing processes and quality control allow us to meet the ever-increasing demands of our business partners and their customers.

The manufacture of the pouffes takes place in 100% in Poland, which guarantees continuity of supplies, smooth realisation of orders and high quality of products.

QUALITY STANDARDS

Many years of cooperation with the world's largest partners, such as DISNEY and IKEA, have had a significant impact on the design, implementation and continuous development of manufacturing, logistics and control processes required in cooperation with this type of customers.

The granulate we use is completely safe as it contains no bromine compound. It is characterised by its repeatability in size and adequate elasticity. Each batch of granulate undergoes regular testing based on the requirements of our major partners.

The knowledge and experience of the sewing room team allows us to cope with practically any task and to adapt flexibly to new challenges.

QUALITY OF MATERIALS

Sewing a pouffe seems easy. But for the quality word to acquire its proper meaning, it is necessary to combine sewing experience with high-class materials. Quality of fabrics, trims, granulate used (which does not compact too quickly) or finally the type of thread used for sewing is crucial.

DESIGN

Sit-Sit is constantly developing - we continuously follow trends and invest in design. Wide contacts with designers and constructors of upholstered furniture, as well as with suppliers of fabrics allow us to create diverse collections both in terms of design and finishing materials used.

In 2020 we expanded our range to include outdoor pouffes and in 2022 – outdoor sofa systems. They consist of single components/modules – from which individual configurations can easily be created. Each module is packed in a separate cardboard, while assembling the furniture is simple and intuitive. The sofa system have been designed with online shops in mind, for which features such as fast and flexible delivery, optimal logistics and simple assembly/disassembly are essential.

More news to come – and we look forward to working with you!
